

Position Opening

Rangeland Field Technician General Technician

Seasonal: Spring-Fall 2024 (flexible start date)

Duration: May - October

Location: Travel Primarily Western USA & some remote work (Spring training in Fort Collins, CO)

Deadline: Position is open until filled

Compensation: DOE (starting at \$1,700 per month)

About Us:

SnapLands was founded in 2017 with the mission to restore a profitable path towards, and proof of, land restoration. We are a rapidly expanding team of applied land managers and scientists with a passion for land stewardship, botany, technology, agriculture, and ecological restoration. We serve a growing network of land managers across millions of acres and are committed to being both grounded and innovative. At SnapLands, we apply proven methods to provide land managers with the best possible data about their land while supporting sound decision making, and profitable land stewardship.

If you want to spend time working across epic landscapes, have a good sense of adventure and appreciation for diversity, and a desire to be on the front lines of land restoration and ecosystem services, we would love to hear from you.

Position Description:

Our Rangeland Technicians are the essential to our team and conduct rangeland monitoring and data entry to support land managers striving to sustain or achieve regenerative status across a variety of landscapes - open forests, sagebrush steppes, short-grass prairies, and riparian areas. All technicians will be trained in and practice two established rangeland monitoring methods.

Rangeland Technicians travel extensively within the Great Plains and Rocky Mountain region, with potential travel to other regions. Your contributions will be instrumental in supporting managers in achieving their land management goals. This entry-level position offers opportunities for professional growth with a strong emphasis on rangeland monitoring. As part of a rapidly expanding team, this position also provides an opportunity to grow with the company and take on additional projects.

Key Job Responsibilities:

- Collect and manage field data for effective reporting to clients.
- Assist with planning rangeland monitoring excursions, including scheduling, travel, and equipment management.
- Help coordinate, organize, and facilitate field days on ranches.
- Provide feedback and solicit additional information and clarification as necessary to clients and SnapLands staff.

Key Qualifications and Skills:

- Proficiency in scientific writing and editing.
- Computer and technology literacy.
- Enjoyment of traveling in diverse terrain and respecting diverse peoples of all demographics.
- Ability to travel away from home for extended periods.
- Ability to kneel, lift over 50 pounds, walk long distances, and work outside in all conditions.
- Proficiency in using GPS or mobile devices to navigate terrain when out of service.
- Navigation of backcountry terrain using ATVs or 4-wheel drive vehicles.
- Wilderness first aid, extensive camping experience, or the like is preferred but not required.
- Experience in GIS software (Google Earth Engine, QGIS, ArcGIS).
- Self-motivated problem-solving mentality and a strong work ethic.
- Self-discipline, strong organization, acute attention to detail, and punctuality.

Additional Requirements:

- Successful completion of a drug test.
- Possession of a valid driver's license and clean driving record.
- Satisfactory results from a criminal background check.

The position will remain open until filled.

Application Process:

To apply for the Rangeland Monitoring Technician position, please submit the following documents to Careers@SnapLands.com:

1. A Letter of Interest
2. Your CV (Curriculum Vitae)
3. Three Professional References

Please make sure to include "Rangeland Monitoring Technician" in the email subject heading when you submit your application. Incomplete applications will not be considered.
