

Position Opening

Rangelands Field Technician Paid Internship

Seasonal: Spring-Fall 2024 (flexible start date)

Duration: May - October

Location: Primarily Western USA & remote work (Spring training in Fort Collins, CO)

Deadline: Position is open until filled

Compensation: \$400 - \$800 per month (DOE)

About Us:

SnapLands was founded in 2017 with the mission to restore a profitable path towards, and proof of, land restoration. We are a rapidly expanding team of applied land managers and scientists with a passion for land stewardship, botany, technology, agriculture, and ecological restoration. We serve a growing network of land managers across millions of acres and are committed to being both grounded and innovative. At SnapLands, we apply proven methods to provide land managers with the best possible data about their land while supporting sound decision making, and profitable land stewardship.

If you want to spend time working across epic landscapes, have a good sense of adventure and appreciation for diversity, and a desire to be on the front lines of land restoration and ecosystem services, we would love to hear from you.

Position Description:

This position is designed to provide one with a unique experience in rangeland monitoring and the chance to connect with leading members of the regenerative ranching community. As an Intern, you will receive training and hands-on experience in at least two rangeland monitoring methods. Your focus will be on conducting rangeland monitoring and data entry, and contributing to sustainability, restoration, and regenerative efforts across a variety of landscapes.

This internship offers a fantastic opportunity to immerse yourself in the world of rangeland management, gain valuable experience, and build relationships with experts in the regenerative farming and ranching community. You will travel extensively within the Great Plains and Rocky Mountain region, with potential travel to other regions. Your contributions will be instrumental in supporting managers striving to achieve their land management goals.

This position is for individuals who are eager to learn, passionate about factual land health, and keen to connect with professionals leading the way in regenerative ranching practices.

Key Job Responsibilities:

- Collect and manage field data for effective reporting to clients.
- Assist with planning rangeland monitoring excursions, including scheduling, travel, and equipment management.
- Help coordinate, organize, and facilitate field days on ranches.

Key Qualifications and Skills:

- Experience in scientific writing and editing.
- Computer and technology literacy.
- Enjoyment of traveling in diverse terrain and respecting diverse peoples of all demographics.
- Ability to travel away from home for extended periods.
- Ability to kneel, lift over 50 pounds, walk long distances, and work outside in all conditions.
- Navigation of backcountry terrain using ATVs or 4-wheel drive vehicles.
- Wilderness first aid, extensive camping experience, or the like is preferred but not required.
- Experience with GIS software (Google Earth Engine, QGIS, ArcGIS).
- Self-motivated problem-solving mentality and a strong work ethic.
- Self-discipline, strong organization, acute attention to detail, and punctuality.

Additional Requirements:

- Successful completion of a drug test.
- Possession of a valid driver's license and clean driving record.
- Satisfactory results from a criminal background check.

Application Process:

To apply for the Rangeland Monitoring Technician position, please submit the following documents to Careers@SnapLands.com:

1. A Letter of Interest
2. Your CV (Curriculum Vitae)
3. Three Professional References

Please make sure to include "Rangeland Monitoring Technician Internship" in the email subject heading when you submit your application. Incomplete applications will not be considered.
